MSE equivalence: separate from difference tests / 46 configurations

MSE TOST, unadjusted alpha 0.05; margin = 5% of COLUMN MSE; directional margins explain asymmetry.

Archived losses: 30,087 series x 24 months; 3-seed mean losses. Eight configurations use revived checkpoints.
Statistical assumptions and provenance limits: results/gallery/README.md. Full-precision values: tables/all_pairwise_tests.csv.
